

Architect: Eden Architects

Main Contractor: Dream Catcher Construction

Brief: To design a new 3m x 5m garden room which would provide a dining area to the kitchen on the lower return and via a new stepped connection to the formal double drawing rooms complete the sequence of a pair of double rooms on the ground floor. The placement, scale and detailing all seek to compliment and enhance the existing formal orientation of the house to the street with a new balancing orientation to the garden.
